

# User and Maintenance Guide

**ATTENTION! Do not use the machine before you have read and understood the Instructions for use manual.**

1. Check the Diesel fuel tank level / LPG bottle charge/Battery charge. In case re-fill/change the LPG Bottle / charge the batteries

2. Check the fresh water level. In case, fill the tank with clean water. The clean water temperature must not exceed 40 °C

3. Fill the EcoFlex™ tank (placed under the seat) with a detergent suitable for the work to be performed (high - ly concentrated detergent)

4. Install the squeegee and fasten it to its assembly then connect the vacuum hose to the squeegee. Make proper height and inclination adjustments

5. Install brushes/ main and side brooms

6. Fill in the DustGuard™ water tank (if equipped)

7. Turn the ignition key to "I"

8. Press One-Touch™ scrub (adjusting the pressure if needed) and One-Touch™ sweep buttons according to your application

9. Adjust to the desired water flow

10. Adjust to the desired chemical concentration (shown in the display)

11. Press the forward pedal and start operating the machine

12. Press the EcoFlex™ switch whenever you temporarily need a greater cleaning power

13. Empty the recovery tank with the hose. Then empty the solution tank with the transparent hose

14. Wash with clean water the recovery tank and the vacuum grid. Remove and clean the debris tray.

15. Close the solution tank valve and remove and clean the filter

16. Dump the hopper, remove and clean the filter

17. Remove and clean brushes and brooms

18. Take the squeegee off, check the blades wear status

19. Remove the side skirts and check the blade status

20. Clean the machine using a damp cloth and park it with the recovery tank open

If the machine has been used until the Red light illuminates on the battery level indicator on the machine, a full recharge of the batteries (10-12 hours) will be required. Failure to carry out this procedure may cause damage to the batteries. Charging the batteries after every use is recommended.

PLEASE ENSURE RED SOCKET IS LEFT DISCONNECTED AFTER RECHARGE IF THE MACHINE IS NOT TO BE USED ON A DAILY BASIS
