TF120R-GTX

Gore™ Filtration For Outstanding Dust Control

Geniune TOPFLOOR Quality, Reliability & Performance

Designed for restricted areas but able to tackle larger open spaces when required, the TF120R-GTX offers maximum operator comfort and the perfect sweeping results that can be assured with the TOPFLOOR direct-throw system. The collection system starts with the side broom(s) which transfer dust and debris into the centre of the machine where a large diameter cylindrical main broom throws everything forward into the waste hopper. Fine dust is also drawn directly into the hopper by a powerful vacuum system which is created by a high efficiency fan, a special heavy duty polyester filter ensuring that only clean air is exhausted back into the environment. With a choice of battery, petrol or LPG power units there is a version of the TF120R-GTX suitable for every type of application

Reliability is also our mantra when it comes to service

The direct throw sweeping system. The most efficient.

It sweeps any type of debris, from the finest dust to the larger, heavier debris you find around the workplace. The waste hopper, placed immediately in front of the main broom, ensures perfect sweeping results even when the broom is nearing the end of its useful life. Adjustment of the main broom pressure is made from the operating position and not only optimizes the sweeping results on uneven surfaces but helps to extend brush life.

Power control not only in the city

The TF120R-GTX can be equipped with the GORE® filtering system, which can filter up to 90% of PM2.5, freeing the environment where we live not only from dirt and dust, but also from the dangerous particulates. The special filtering GORE® materials foster a considerable increase of performance, guaranteeing a higher duration, easy cleaning, reduced maintenance, an increase in the air capacity equal to 35%: all this for a better sweeping quality.

GORE dust filters installed in the industrial sweeper have 5 years warranty.

chassis strength

The chassis is manufactured from high quality electro welded steel for maximum strength, the complete unit is coated with a special primer and finished in a tough polyurethane paint.

environmentally friendly

Topfloor's filtering system is designed to prevent dust (down to 3 Micron) from escaping into the atmosphere. To meet environmental requirements, this machine is available battery powered and LPG too.

ease of maintenance

To simplify maintenance, the machine has been designed with easy access to the power unit and all major components.

Large capacity hopper

The chassis is manufactured from high quality electro welded steel for maximum strength, the complete unit is coated with a special primer and finished in a tough polyurethane paint.

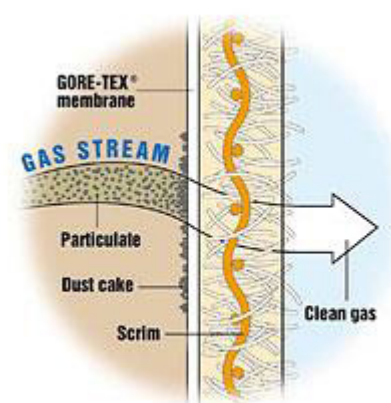

Setting the benchmark for dust control in industrial applications

The new TF120-GTX series are the only sweepers in this category to boast deep-pocket Gore™ filtration for superior sweeping in high dust environments. Gore filtration revolutionises the dynamics of industrial sweeper dust control:

- Minimal filter maintenance required. The filter surface is impenetrable to dust particles meaning dusts remains on the surface of the filter rather than getting trapped in the webbing for a self-cleaning effect, even if there's a total lack of maintenance.
- Over 99% filtration of PM10 particles.
- Consistent filter quality over time. Each filter comes with a 5 year guarantee – you never need to change filters again.
- Sweep wet debris without damaging the filter or losing dust controls performance.
- 35% higher airflow compared to standard filters means powerful vacuum and better dust control.

Technical specifications

Description	Unit	TF120R-GTX
Motor power source		Battery / Petrol/LPG
Productivity rate theoretical / actual	m ² /h	7200
Working width with main broom	mm	700
Working width with right side brush	mm	950
Working width with 2 side brushes	mm	1200
Scrubbing width	mm	530
Max. Speed	km/h	6
Hopper volume	l	85
Max dumping height	cm	NA
Filtration of PM10 Particles		99%
Length x width x height	cm	143x89x134
Weight	kg	330

TOPFLOOR

SIMPLE, STRONG, SAFE

Our Mission

We develop and deliver innovative solutions which help businesses create a safer, cleaner work place environment to protect their employees and maximise productivity. We help our clients focus on their core business activities by delivering a consistently speedy, straightforward, refreshingly different customer experience.
