

TFI30R-TRS

Battery, diesel, LPG or petrol powered ride-on sweeper. Powerful dust control. High-dump hopper. For cleaning net floor surfaces of up to 50,000m².

TFI30R-TRS

The TFI30R-TRS makes light work of sweeping in tough industries. Solid build is matched by outstanding sweeping performance thanks to TRS and two 'automotive grade' vacuums which pull air through a 6m² filter.

The TFI30R-TRS is much safer to operate in busy workspaces. This is because the operator is positioned at the front of the machine to maximise visibility when driving—headlights are also supplied as standard. The TFI30R-TRS also increases overall productivity by reducing user fatigue. The simple, logical control layout, ergonomically crafted operator interface and adjustable seat mean operators can sweep for extended periods in comfort.

For ease of maintenance the TFI30R-TRS features hinged side covers for maximum access to the motors and power source, fast access to main brooms and side brushes and tool free access to the horizontal filter.

- Automatic brush adjustment compensates for wear and tear to maintain consistent sweeping performance.
- Horizontal filter design means better dust control and enable it to be cleaned to a higher standard.
- Laser cut heavy gauge powder coated steel packs a more powerful punch.
- TRS technology means the TFI30R-TRS has a hopper capacity equivalent to 330ltr forward throw system.
- Multiple power source options make it suitable for both indoor and outdoor applications.
- Multi level dumping up to 150cm high for ease of emptying straight into a standard industrial bin.
- Chain drive sweeping (rather than belt drive) reduces maintenance requirements and maximises power transmission.

The TFI30R-TRS means stronger, flexible and more reliable sweeping for users in adverse environments.

“ The TF130R-TRS is re-shaping the landscape in truly industrial applications. ”

| TECHNICAL INFORMATION | TF130R-TRS | OPTIONAL EXTRAS |
|---|---------------------------------|--|
| Power Supply | Battery / Diesel / LPG / Petrol | To personalise your Topfloor sweeper, a range of additional options are available: |
| Theoretical Productivity (m ² /hr) | 13,000 | <ul style="list-style-type: none"> • Side broom speed control to further reduce the airborne dust being whirled up. |
| Main Broom Width (mm) | 800 | <ul style="list-style-type: none"> • Retractable 3rd and 4th side broom arms for sweeping small raised kerbs or increasing the overall sweep path. |
| Total Sweep Width (mm) | 1,400 | <ul style="list-style-type: none"> • On-board vacuum for cleaning between pallets, racking overhead and other surfaces in areas with no power supply. |
| Hopper Capacity (ltr) | 150 | <ul style="list-style-type: none"> • Weatherproof Cab suitable for sweeping in wet conditions. |
| Filter Area (m ²) | 6 | <ul style="list-style-type: none"> • Overhead guard system for safe operation in high-bay warehouses. |
| Airflow Volume (m ³ /hr) | 1,200 | For specific requirements, Topfloor machines can be bespoke built. To explore these options, simply contact us. |
| Max Speed (km/h) | 8 / 10 / 10 / 10 | |
| Turning Circle (m) | 1.6 / 1.9 / 1.9 / 1.9 | |
| Dimensions – L x W x H (mm) | 1,830 x 1,130 x 1,540 | |
| Weight – incl Battery (kg) | 850 / 670 / 690 / 690 | |
