

Create Clean with Rugged, Hand Built, Military-Grade Equipment

**Industrial Scrubber-Dryers for
Intense Cleaning Applications**

The Kodiak Walk Behind Scrubber-Dryers - Hand Built for Industrial Users

Today's floor cleaner machines are too often designed around low cost, high maintenance, short life principles with touch panel controls and delicate electronic circuit boards. Whilst this may suit for light commercial applications (shopping centres, schools, hospitals etc), it makes them an expensive choice for factory or industrial floor cleaning.

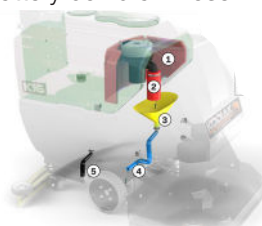

The Kodiak scrubber-dryer range is a full line of rugged floor cleaner machines which are hand built to military grade standards for tough floor cleaning tasks.

Marine Style Toggle Switch Controls: Simple 'clunk/click' functions eliminates the need for delicate electronic control boards and makes for intuitive use if multiple operators are using the machine.

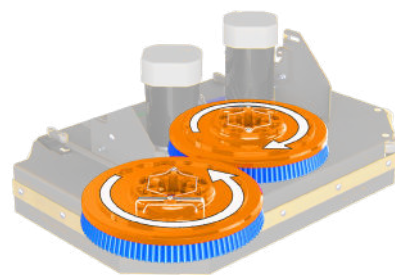

5 barriers protecting the vacuum motor from moisture for lower running costs:

1. Sound absorbing foam
2. Vac exhaust muffler
3. Molded in-tank funnel
4. Blow-by discharge hose
5. Battery box drain hose with valve

Multiple Scrubbing Systems to Match your Need; each Kodiak is available with options of disc, orbital and cylindrical cleaning heads to perfectly match your cleaning application.

Robust 4 Point Chassis: the chassis supports all of the cleaning systems for perfect weight distribution making it more stable and easier to handle. All systems are bolted directly to the steel frame for maximum durability.

Raw Scrubbing Power: 250lb rated actuator delivers maximum scrub pressure. That's approximately 3 to 4 times more pressure compared to standard walk behind floor cleaners. This means you create clean quickly and effectively to a higher standard.

3 Year Warranty: every Kodiak is hand built in America and is supplied with a 3 year warranty for your complete peace of mind.

Choose the Scrubbing System to Match your Need

Each Kodiak is available with multiple scrubbing systems to perfectly match your needs including Disc, Orbital and Cylindrical.

Full In-House Manufacturing for Perfect Quality Control and Rapid Delivery

Most manufacturers assemble components from multiple suppliers leaving them vulnerable to supply chain disruption, quality control issues or spares support.

All Kodiak machines are manufactured and hand built in Kodiak's factory in America including rotational-moulding of tanks, metal cutting and fabrication for the chassis and wiring cutting and crimping for perfect quality control and rapid delivery. Take a virtual tour of the Kodiak factory: (attached Kodiak Tourqr) linked to <https://crescent-industrial.dubb.com/v/CgdGIm>
