

# Create Clean with Rugged Industrial Cleaning Equipment

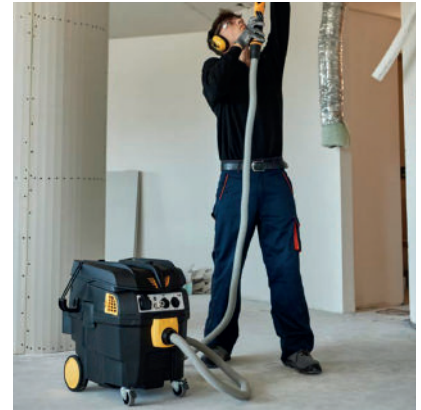

**Industrial Vacuums for  
Construction and High-Dust  
Applications**

---

# HV140-ACS Industrial Vacuum

---

A professional vacuum cleaner with a 800W power tool socket designed for construction sites and other high-dust applications. HEPA filters and a large collection container complete this rugged machine along with a range of accessories for a variety of cleaning methods.

## Features

- **Large rear wheels** guarantee excellent stability across uneven ground
- **Swivel front wheels with brakes** provide superb manoeuvrability around complex areas
- **Intuitive control panel** makes for easy and intuitive operation
- **Flexible collection options** allow for debris to be vacuumed into a bag or container
- **Mechanical shaking system** keeps filters working to maximum efficiency
- **Different container options** mean dry debris and liquid can be collected

## Specifications

- 1400W vacuum motors
- 110V power supply
- Two HEPA filters
- 17.5kg weight
- 245mbar waterlift
- 35 litre dirt container
- 800W power tool socket
- Hose blockage alarm light
- 56l/s airflow
- 99.9% filter efficiency

The power levels and the large collection compartment complete the job quickly and precisely. Our vacuum cleaners are robust and designed to work with many tools and various accessories in the most difficult conditions, facilitating on-site performance and safeguarding the health of operators.
