

Create Clean with Rugged Industrial Cleaning Equipment

**Heavy-Duty Scrubber-Dryers for
Industrial Cleaning Applications**

K42 Ride-on Scrubber Dryer

Today's floor cleaner machines are too often designed around low cost, high maintenance, short-life principles with touch panel controls and delicate electronic circuit boards. Whilst this may suit for light commercial applications (shopping centres, schools, hospitals etc), it makes them an expensive choice for factory or industrial floor cleaning.

Designed and handmade in Wisconsin USA, the rugged K42 is specifically designed for frequent scrubbing and drying of intense-cleaning industrial applications such as warehousing and bakery/food manufacturing.

Exceptional strength combined with size-defying manoeuvrability gives the K42 the versatility to be deployed into almost any application.

The Kodiak scrubber-dryer range is a full line of rugged floor cleaner machines with multiple scrubbing options, hand built to military-grade standards for tough floor cleaning tasks.

Features

- **Multiple scrub head options** – Both disk and cylindrical scrubbing heads provide an option for almost any floor surface.
- **Dual LED headlights, orange beacon and blue working light** – Increases visibility and enhances safety in low-light conditions.
- **Optional vacuum wand and spray jet** – Allows for effortless pre-soaking of floors, washing out recovery tanks and vacuuming up spills.
- **USA design and manufacture** – All machine hardware components are assembled in-house, by hand in Wisconsin.
- **Marine style toggle switches** – Make for simple 'clunk/click' operation that enables easy operator training and eliminates delicate electronic control boards.
- **3 year warranty** – Just to prove we know how robust the K42 is, we supply it with a warranty for complete peace of mind.

Specifications

- Up to 4,087 m²/hr cleaning performance
- Heavy-duty 4.8mm steel chassis
- 151 litre solution tank
- 159 litre recovery tank
- 270rpm brush speed
- 660-810mm scrubbing path
- Dimensions (L/W/H): 1700mm/740mm/1520mm
- Up to 4 hours run time
