

Create Clean with Rugged Industrial Cleaning Equipment

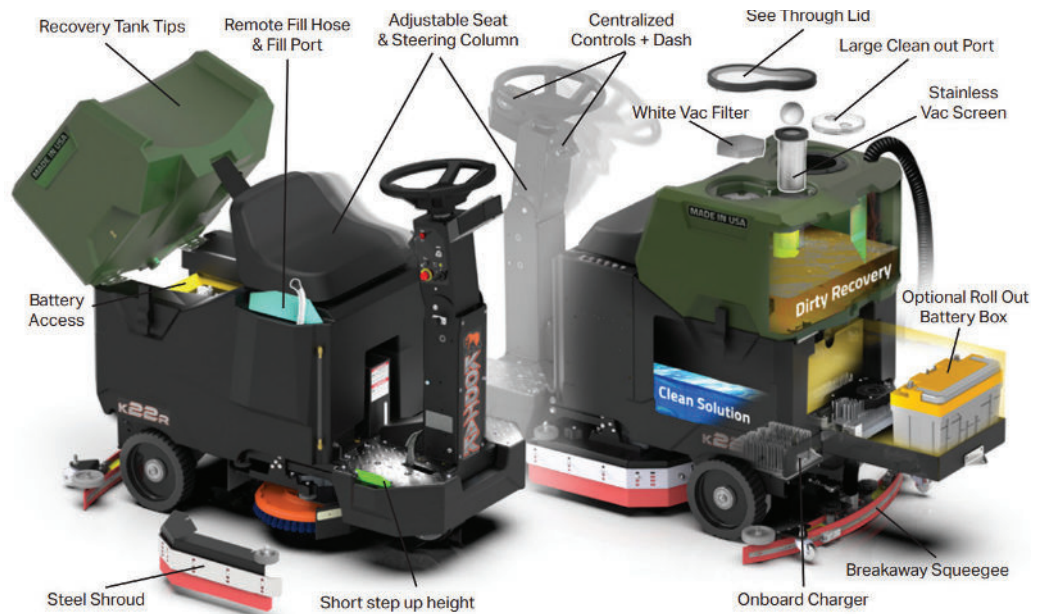

**Heavy-Duty Scrubber-Dryers for
Industrial Cleaning Applications**

K22 Ride-on Scrubber-Dryer

Unlike many modern cleaning machines designed for light commercial use — with fragile electronics, touch panels, and short service lives — the Kodiak K22 is engineered for real-world industrial cleaning where durability and simplicity matter most.

Designed and hand-built in Wisconsin, USA, the K22 is a compact ride-on scrubber dryer purpose-built for frequent, heavy-duty cleaning in demanding environments like warehouses, factories, and food production areas.

Features

- **Compact and manoeuvrable** – Tight turning radius for easy navigation in narrow aisles and congested spaces.
- **Multiple scrub head options** – Both disk and orbital scrubbing heads provide an option for almost any floor surface.
- **USA design and manufacture** – All machine hardware components are assembled in-house, by hand in Wisconsin.
- **Marine style toggle switches** – Make for simple ‘clunk/click’ operation that enables easy operator training and eliminates delicate electronic control boards.
- **Optional disinfectant spray gun** – For effortless disinfecting of surfaces from the drivers seat.
- **3 year warranty** – Just to prove we know how robust the K22 is, we supply it with a warranty for complete peace of mind.

Specifications

- Up to 3,345 m²/hr cleaning performance
- 270rpm brush speed
- Heavy-duty 4.8mm steel chassis
- 510-660mm scrubbing path
- 83 litre solution tank
- Dimensions (L/W/H): 1250mm/690mm/1070mm
- 159 litre recovery tank
- Up to 4 hours run time
